Dear Petitioner,

***Re: Woodlawn Avenue West – Petition to Implement Turn Prohibitions***

I acknowledge receipt of your petition to implement turn prohibitions on your street to mitigate the commuter traffic during rush periods.

Please find attached the letter to Transportation Services requesting a report on the feasibility of your requests. Once I have received that report, I will hold a public meeting in your area to discuss these proposals with you. Transportation Services' staff will be present at that meeting.

Also, at that same meeting we can discuss Transportation Services' feasibility report regarding your petitioned request for speed humps. Unfortunately, the speed hump feasibility report is negative due to the low speed counts of the through traffic on your street. Your proposals for turn restrictions should be able to achieve a similar traffic calming effect as speed humps, via diversion of traffic.

I will be in contact once I have received the report from Transportation Services.

Yours sincerely,

Michael Walker  
Councillor - Ward 22

Encl.
